

High-Grade Magnetite

Global Reach

Who We Are

Universal Minerals is a family-owned, global supplier of high-grade magnetite, proudly based in Texas and trusted across the mining and industrial sectors for over 45 years.

We supply, and deliver a high-quality product with end-to-end logistics, helping operations worldwide run smoother, cleaner, and more efficiently.

We are now expanding strongly into the Australian market, bringing the same reliability and superior quality that our clients already depend on.

Why Clients Choose Us

We don't just supply magnetite, we become a true partner in your success.

A team that grows with you. We scale with your needs, offering flexible volumes and consistent quality as your operation expands.

Trusted relationships. Long-term partnerships built on transparency, reliability, and honest communication. Many clients have worked with us for decades.

Forward-thinking guidance. Expert advice on logistics optimization, and process improvements that deliver real competitive advantages.

Expanding Across Australia

How We Help

We help you improve performance, reduce risk, and support growth for a stronger business today and in the future.

- Achieve superior performance in dense medium separation and coal washing with unmatched magnetite purity.
- Reduce consumption and downtime through consistent, high-grade supply.
- Simplify global (and now Australian) logistics with reliable transparent delivery.
- Gain support from a team that truly understands your challenges.

The result? Real resilience and a foundation for lasting success.

Industry-Specific Expertise

Magnetite engineered for coal washing, water treatment, energy production, concrete, pigments, and more.
Always optimized for your exact application.

Trusted by Industry for Over 45 Years

Family-owned. Globally proven.
Now proudly growing our presence in Australia and beyond.

Local support powered by
45+ years of high-grade
magnetite supply.

We're in this with you.

Let's explore what
we can do, together.
